## **Rules and Regulations Governing Service Furnished to Subscribers.**

---

The following are the Rules and Regulations governing Subscribers' telephone service furnished by the IOWA TELEPHONE COMPANY within its Ames Exchange:

All telephone equipment furnished to subscribers shall be used only by the Subscriber or members of his family, his guests or persons residing with him, or by his agents or employees when engaged in his business; shall not be used in any manner in competition with the business conducted by the Company; shall not be removed from the Subscriber's premises except by an agent of the Company; shall not be connected with any equipment or appliance not furnished by the Company; and shall be surrendered to the Company upon termination of the Subscriber's right of use.

At all reasonable times the Company, through its authorized employees shall have the right of access to the premises of the Subscriber to install, inspect, or repair the lines or equipment, or to remove them upon termination of Subscriber's right of use.

The Company does not guarantee uninterrupted working of its lines or equipment. For any complete failure of service of more than twenty-four hours duration, of which the Company is promptly notified in writing, a pro rata abatement of the contract charge will be made.

The Company reserves the right to change the Subscriber's telephone number or designation at any time.

The Subscriber will be required to pay the Company's customary charges for any change in the location of his telephone equipment, made at his request.

The Subscriber agrees to pay the Company at its established rates for all supplemental service or equipment which the Company may furnish upon his written or verbal order.

The Company may at any time demand payment on account in advance of the establishment of service.

All bills are due when rendered, and are payable at the Company's office. Failure to receive bill, however, does not exempt the Subscriber from prompt payment as required by contract. In the event of any default of payment or other breach of the terms of its service contract, the Company may discontinue the Subscriber's service, or disconnect or remove his telephone equipment.

# General Information.

**CALL CENTRAL** by removing the telephone receiver from the hook.

**WHEN THE OPERATOR ANSWERS** your signal by saying "Number," give her the desired Telephone number, slowly and distinctly, one figure at a time, as: "four, five, two," (452) and see that she repeats it correctly.

**HANG UP THE TELEPHONE** when through talking. This signals the operator, automatically, that you are through, and until then she will not disconnect your line.

**TO CALL IN THE OPERATOR** for a second connection, or to correct a mistake, move the hook slowly up and down a few times. This flashes a small electric lamp signal in front of the operator, but if done too quickly may not be noticed by the operator.

Calls given by name instead of by Telephone number must be referred to a special information operator, as your regular operator is not provided with any printed list of subscribers and is not allowed to delay answering other calls while looking up numbers of subscribers called by name. Subscribers will no doubt recognize the importance of this rule in promoting good service, and their co-operation in enforcing it will be greatly appreciated.

**TO MAKE A "LONG DISTANCE" OR "TOLL CALL,"** ask the operator for "Long Distance" and give the Long Distance operator your own Telephone number and the name and telephone address of the person you wish to be connected with.

---

Notify Repair Department if your telephone is out of order. Call the Manager's Office if you fail to receive prompt attention, or wish to make an inquiry or complaint.

---

Rural subscribers' numbers are shown in four figure numbers, the first two figures indicating the line, and the second two the code ring, as, Number 2906, means line number 29, and code ring 6, which is one long and two short rings.

Number 5917 is line 59, and code ring No. 17, which is two short and one long ring.

## **TOLL RATES.**

### **NOTICE TO TOLL PATRONS**

No charge will be made for toll line service when a particular person is called for and cannot be found, except the messenger service, if any, to look up the party. If, however, a firm or telephone number is called for, without specifying any particular person wanted, and the connection is once established, the regular tariff rate will be charged.

Subscribers desiring toll line service will be held responsible for all toll line connections originating from their telephones. No refund will be allowed unless claimed within twenty-four hours after an unsatisfactory service. Bills for toll service will be rendered monthly. When payment is refused, the subscriber's line will be barred against further use of Toll Lines until payment is made at this office.

Frequent applications are made to this Company's employees for the transmission and delivery of oral or written messages for toll line patron; but, while the Company desires to afford every reasonable accommodation to the public, the use of its lines is authorized only for and by patrons personally present at the telephone.

The Company does not undertake to transmit or deliver oral or written messages, and will assume no responsibility for such service. Any person or employee who assists patrons in communications does so, in each case, solely as the individual representative of the patron.

The Company's advertised rates for toll service cover in each case but one connection, and use or retention of the line not to exceed the minimum time shown on the Company's standard schedule as representing one communication. For all further or additional use or retention of the line in excess of the first period an additional charge will be made for consecutive periods, as shown on effective rate schedules.

## “WATERED STOCK”

It has never been claimed by any reputable authority that there is any “water” in Bell Telephone stock. The actual physical property of the Bell System is worth more than it is capitalized for.

That a dollar's worth of property is actually there for every dollar's worth of stock that has been issued, has been proved beyond all doubt by hundreds of impartial investigations by commissions and governing bodies.

The Bell System is conceded to be the best constructed and best equipped telephone system in the world, yet the capitalization of the Company is less per telephone than that of any other comprehensive telephone system on earth.

## THE BELL SYSTEM

# WHAT DO WE DO WITH YOUR MONEY

The Bell Telephone System has always recognized the right of the public to know how it operates its business and what it does with the money it collects from the people.

The investment of the Bell Telephone System, including instrument, cable, wire, central office equipment, etc., averages \$152 per telephohne. The average revenue collected last year from each telephone for local and long distance business was \$40.20. This money was spent as follows:

\$18.72 Employees' Wages.

\$9.62 Light, Heat, Welfare, Material, etc.

\$2.26 Taxes.

This leaves \$9.60 out of the \$40.20 per telephone, of which \$7.75 was paid in dividends and interest on borrowed money, and \$1.85 placed in a reserve fund for emergencies.

For seven years the Bell Company has not paid more than an 8 per cent dividend.

There is no "water" in the Bell Telephone stock, as has been certified to and confirmed by thousands of examinations and investigations.

It is our policy to have every employee proud of the Company, proud to serve it and its patrons, and jealous of their own and the Company's good name. One Bell employee in every five, or 30,000 employees in all, own stock in the Company.

## THE BELL SYSTEM

# The American Telephone

The states of Iowa, Nebraska, Minnesota and the Dakotas have more telephones than all Great Britain.

The city of New York has more telephones than all of France and Spain combined.

Iowa or Minnesota each have more telephones than all of Russia. Chicago has more telephones than all of Austria.

In the United States we have but 6 per cent of the world's population, yet we have 65 per cent of all the world's telephones.

## Extending the Service

Widespread publicity, advertising and canvassing and good service have developed the telephone in the United States. The value of telephone service has been driven home to the public. New ways of using the telephone have been exploited and people have been taught to depend upon the telephone.

The government-owned systems in other countries neither advertise nor canvass for business. Telephone growth, the large number of telephone users that make the service valuable to the public, has not been encouraged.

The United States leads the world in giving the best telephone service at the lowest rates.
